## Electrical Safety Checklist

- Is your consumer unit / fuse board made of metal?
- Is there a sticker on your fuse board telling you when your next electrical inspection is due?
- Does your consumer unit / fuse board have an RCD (Residual Current Device) fitted?
- Are your sockets over loaded?
- Is there any damage or discolouration on socket outlets, light switches / fittings, shower switches and plugs/extension leads?
- Have you got a mains powered smoke alarm on each floor of your property?
- Is the incoming gas pipe and incoming water pipe bonded (look for a green and yellow cable attached to these pipes)?
- Do you have a valid EICR (Electrical Installation Condition Report)?
- Do you have round light switches?
- Are your sockets mounted on or in your skirting boards?

If you have any boxes unticked, then please contact a local electrician to give you professional advice on the safety of your property.
